Nimbus Compute Corp. Investor Day 2026

Revenue growth reflected higher demand for AI infrastructure and data center capacity across our markets.
The Board authorized a new share repurchase program of up to $2.0 billion.

AI infrastructure build-out

We plan to bring 2.4 GW of new AI data center capacity online across our global campuses by 2028.
Operating expenses increased as we invested in capacity, data center operations and engineering headcount.
Data center capacity, GPU clusters and networking remain our largest capital programs.
